02 · TYPOGRAPHY

STYLE	FONT · SIZE / LINE · TRACKING	USED FOR	SAMPLE
Display XL	Big Shoulders 900 · 96 / 0.82	Hero % on insights (71%).	71%
Display L	Big Shoulders 900 · 72 / 0.85	Day score count (4/7).	4/7
Score	Big Shoulders 900 · 60 / 0.85	Week & month score cards, leader %.	71%
Title	Big Shoulders 900 · 46 / 0.9 · upper	Screen title when short (TODAY, CREW 52).	TODAY
Title compact	Big Shoulders 900 · 36 / 0.9 · upper	Screen title that must fit next to the switch (OCT 12–18, OCTOBER).	OCT 12–18
Stat	Big Shoulders 900 · 26–34	Stat tiles, leaderboard %, ring %.	84% · WED · 16
Motto	Big Shoulders 800 · 17 · +0.06em	One motivational line per screen.	DREAM IT. BUILD IT. LOCK IT IN.
Row title	Geist 600 · 15 (14 in week cards)	Habit names, people names, list rows.	Deep work 2h
Body	Geist 400 · 13–14	Sentences inside cards.	25 of 35 check-ins so far
Caption	Geist 400 · 12.5 / 1.45	Helper text under a section.	Private habits never show up in Crew.
Label	Geist Mono 500 · 11–12 · upper · +0.05–0.1em	Card labels, date line above titles.	WK 42 · THIS WEEK
Data	Geist Mono 500–600 · 10–17 · tabular	Counts, %, times, dates in cells.	4 of 7 this week · 18:40

Three families only. **Big Shoulders** = anything you should feel (numbers, titles, mottos). **Geist** = anything you read. **Geist Mono** = labels, dates and counts. Numbers are always tabular so they don't jump when they change.

03 · LAYOUT & SPACING

Screen

same on every screen

Side margin	20	Left and right edge of all content. Nothing touches the screen edge.
Top inset	58	From the top of the screen to the first element (54 when the first row is back / gear buttons).
Block gap	18	Between the big top blocks: header → day strip → score card → motto.
List padding	18 top · 112 bottom	112 = 64 tab bar + 24 bottom inset + 24 air, so the last item is never hidden.
Tab bar	16 sides · 24 bottom	Floating capsule, 64 high, 5 inner padding. Round action button sits 10 to its right.

Inside cards

padding = space from card edge to content

ScoreCard (ring)	18 · 20 left	Today. Left is 2 more so the big number lines up with the habit icons.
ScoreCard (bar)	16 × 18	Week and Month, 16 top/bottom, 18 left/right.
Insight card	16	All insights cards. Chart card uses 12 at the bottom under the day letters.
HabitRow	0 × 10 · height 62	Today. Content is vertically centred, so only side padding.
WeekHabitCard	12 · 14 · 14	Week, 12 top, 14 sides and bottom; 10 between title row and cells.
MonthHabitRow	12 × 14	Month. 10 between title row and week clusters.
StatTile	14 × 12	Insights and Profile, always 3 in a row.
List card	4 × 16 · rows 52–56	Crew feed, Profile lists. Rows carry their own height; dividers between them.
Leader banner	18 × 20	Crew. Same rhythm as the day score card.

Between siblings

gap = space between items in a group

Switch segments	2	Between the pills inside a glass switch.
Day strip	4	Between the 7 day cells.
Rows & cells	6	Habit rows on Today, the 7 cells in a week card, day pills, the 5 month clusters.
Cards	8	Week cards, month rows, stat tiles, icon picker, chips.
Groups	10	Tab bar → round button, accent picker tiles.
Icon ↔ text	12	Inside rows; ring ↔ numbers inside the score card.
Sections	14	Insights sections, Crew sections.
Blocks	18	Top blocks, Profile sections. New habit form fields use 22.

Text stacks

vertical gap inside a text group

Label → title	4	FRI · 16 OCT above TODAY.
Title → meta	3	Habit name above "4 of 7 this week".
Label → value → caption	6–8	DAY SCORE → 4/7 → chain line; stat tiles.

04 · CORNER RADIUS

Rule: **the bigger and more important the surface, the rounder it is.** Cells 12 → rows 20 → cards 22–24 → hero cards 26 → glass is always a full capsule. A shape inside a card is always less round than the card. All corners are continuous (iOS "squircle", `.continuous`).

2 — Micro
Month bars (5.5 × 18), mini bars in leaderboard, legend chips.

3–4 — Bar
Progress and score bars = half their height. Not-tracked month block.

12 — Cell
Week cells (40 pt) and month week-heads.

13–14 — Tile
Icon tile in habit rows (13), stepper and icon picker buttons, start-week options (14).

18 — Day cell
Day strip cells (68 pt), stat tiles, text field, switch-row button.

20 — Row
Habit rows, month rows, dashed "Add a habit", list buttons.

22 — Card
Insights cards, week habit cards, accent picker tiles.

24 — Card L
Week & month score cards, leaderboard, feed and list cards.

26 — Hero
Day score card, leader banner, Settings preview — the one card that matters most on a screen.

40–48 — Device
Only the phone frame in mockups. Never inside the UI.

full — Capsule
Everything glass + all buttons: tab bar, switches, nav buttons, round action, Lock it in, chips, avatars, toggles.

05 · MATERIALS

Two layers. The **content layer** (cards, rows, charts) stays crisp so data reads perfectly. The **navigation layer** (tab bar, switches, nav buttons) floats above it in glass, and content scrolls underneath. Specimens sit on stripes so you can see what each material does to what's behind it.

CONTENT

Card

```
fill white 5.5%
stroke 1 pt white 7%
top highlight 1 pt white 7%
```

Use: every container that holds data.

Don't: blur it, put it on the tab bar, nest a card in a card.

NAVIGATION

Glass

```
fill rgba(28,28,32,.55)
backdrop blur 24 · saturate 180%
stroke white 18% · highlight white 10%
shadow 0 18 30 black 50%
```

Use: tab bar, view and period switches, back / gear / close, Invite pill. Switch: .glassEffect().

Don't: use for content cards or big areas — glass on glass gets muddy.

ACTIVE TAB

Lens

```
fill white 13%
top highlight white 18%
content tinted accent
```

Use: only the active item inside the tab bar.

Don't: use outside glass.

SELECTED

Selected pill

```
solid #F4F4F2
text #0A0A0B
```

Use: chosen segment in any switch, today in the day strip, chosen day pills.

Don't: use for buttons — white is selection, accent is action.

ACTION

Accent

```
fill accent
top gloss white 60% · 1.5 pt
inner shade black 18%
shadow 0 10 30 black 60%
```

Use: round action button, Lock it in, done checks, leader banner.

Don't: have more than one big accent surface per screen.

INSIDE A CARD

Raised

```
fill white 7–9%
optional highlight white 12%
```

Use: icon tiles, stepper buttons, your own row in the leaderboard.

Don't: use as a top-level container.

EMPTY

Track

```
white 18% (bars)
white 9% (rings)
```

Use: the unfilled part of bars and rings.

Don't: use as a card fill.

LOADING

Skeleton

```
white 7% ↔ moving sheen white 11%
1.6 s ease-in-out loop
```

Use: only on values that come from the server, at the exact size of the value.

Don't: shimmer titles, labels, cards or glass.
